

WasteWorx®
PUMPING STATION SOLUTIONS

When Gravity Just Won't Work.

WasteWorx® Pumping Stations

Our latest generation of WasteWorx® wastewater pump chambers are the most versatile on the market. They feature a range of sizes and shapes for easy installation and anti-flotation capabilities. The adjustable lid options, durable controllers designed to extend pump life, and high-quality pumps make this an ideal solution for all your wastewater management needs.

Versatility

- Full commissioning included.
- 700 and 1000 litre chamber sizes.
- Adjustable lids for easy installation.
- Garden and concrete or driveway lids available.
- Anti-flotation ring built in, no need for concrete around base.
- State of the art controllers help protect the pump from burnout.
- Connectivity to Scada networks available by demand.
- Chamber is 100% recyclable.
- Square shape minimises excavation.
- Maintenance service available, please contact APD for recommendations.
- Manufactured to AS/NZ 4766:2020 and AS/NZ 1546.

Doing Good From The Ground Up

When Gravity Just Won't Work.

Pumps and Controllers

- Pumps available for chambers supplying both pressure and gravity networks.
- Oil filled motor for optimal heat dissipation: This design minimises concerns about the pump overheating or breaking down due to extreme heat generation during extended-use applications.
- Corrosion-resistant, powder coated epoxy finish.
- Surface hardened shredder mechanism: This feature enables the pump to cut through challenging materials while also providing excellent corrosion protection.
- 100% factory tested: Our factory-tested pumps ensure reliable performance in challenging applications with fewer concerns about mechanical failures.
- Automatic thermal overload protection (1 Phase).
- Legs provide for freestanding installation.
- RCM certification.
- State of the art controllers help protect the pump and extend pump life.
- Specialist pumps and controllers are available for pressure sewer applications.
